I believe in creating, shipping, learning, and having fun. My goal is to continually improve and conquer new challenges.

Technical Skills

Like: ruby, php, css, javascript, html, git, osx, mongodb, cucumber, amazon-ec2, heroku, mvc, restful
Dislike: soap, coldfusion

Experience

Manager Software Development – bieMEDIA 2009 - 2012

- Moved from intern to Manager Software Development in a short period of time.
- Managed a team of 3 developers. Heavily interacted with leadership members from other departments and executives.
- Built and oversaw several large internal systems to improve business productivity including order management (RoR/MongoDB), video hosting/delivery (RoR/MySQL), and asset management/control (PHP/MySQL).
- Integrated systems with a large number of third party API's. Including SendGrid, YouTube, Ooyala, Facebook, and Twitter. Integrated with several customer API's as well.
- Developed and deployed server automation tools to increase Amazon ec2 deployment speed (Puppet).
- Reduced server costs by installing server monitoring tools (NewRelic) to track performance and usage of machines. Was able to reduce instance size on several machines lowering monthly charges.
- Worked to improve developer productivity by creating continuous integration servers (Jenkins and Travis CI), code deploy systems (Hubot/Capistrano and git hooks), and improved the quality of internal documentation (TomDoc and Zendesk forums).

Freelance 2008 - 2012

- Created lots of WordPress sites for people, ranging from simple theme tweaks to complete custom themes. Examples available at <http://www.travisberry.com/work/>
- Setup and managed hosting for clients.
- Made recommendations for a simple small business network.
- More free tech support for friends and family than you can shake a stick at.

Education

Bachelor of Arts in Digital Filmmaking and Video Production – Art Institute of Colorado 2006 - 2010

- Won outstanding portfolio award.
- Worked with a couple students to create and release a feature length documentary. This experience directly led to my moving into programming.

Projects & Interests

GitHub - Hospitium – <https://github.com/ninetwentyfour/Hospitium> September 2011 - April 2012

Animal Management Software for Rescue/Shelters

Creator

GitHub - Homkora – <https://github.com/ninetwentyfour/Homkora> December 2010 - April 2012

Super simple time tracking application

Creator
